Biography

Jamie Collins, RDH-EA, BS is a hygienist licensed in Idaho and Washington states and is dedicated to advancing the dental profession. With over twenty years in the dental field, she is involved in many aspects of patient care. She was awarded the ADHA Trailblazer Award in 2022. Jamie has published over 80 articles, contributed to multiple textbooks, curriculum development, and contributes as a key opinion leader for various companies. Her experience has led to her being named the Professional Education Manager at Mouth Watch.

Course Description Vaping

The popularity of vaping among all ages is on the rise, often with unregulated products. The market is catering to the younger generation creating users at an epidemic rate, marketing appealing and concealing devices and flavors. Because there have been few studies and the long-term effects are widely unknown, the education and screening of patients is a key element in any dental practice. Attendees will learn the dangers, and the impact on the oral and systemic health conditions, leaving with the knowledge to discuss vaping with patients.

Learning Objectives

- Review the effects on the body of vaping and the common ingredients in vaping devices
- Learn conditions and risks that can be associated with vaping
- Discuss most recent studies related to vaping dangers
- Discuss recommendation options that may be utilized to discuss dangers with patients

Course Description Managing the Spectrum of Autism Care

One in 44 children have been diagnosed on the Autism Spectrum, with approximately 100 newly diagnosed patients daily. Treating patients on the Autism Spectrum in a dental practice presents a multitude of challenges from behavior and cooperation concerns to related health concerns, not to mention the oral considerations associated with medications. As these children on the Autism Spectrum age and integrate into society as young adults many also age out of pediatric dental practices and are seen in general practices. As a practicing hygienist and mother of an Autistic child, the speaker has learned methods to ease the anxiety associated with dental appointments for many patients, in addition to common oral conditions that may affect individuals with special needs.

Learning Objectives

- Learn Autism Spectrum symptoms and commonly related disorders
- Review of common medications used to treat symptoms of the disorder and oral implications
- Discuss recommendation options that may be instrumental for improved homecare
- Introduce alternative methods to treat patients with Special Needs in the dental office

Course Description Diabetes by the Numbers

Thirty-three million Americans are afflicted by Diabetes Mellitus, with 7.2 million cases undiagnosed. With the increasing diabetes epidemic, it is estimated that by the year 2050 one in three Americans will be diabetic in their lifetime. Diabetic patients are 2-3 times more likely to develop periodontal disease than non-diabetics. With 80% of

diabetics residing in the middle and lower socioeconomic American society, dental clinicians have the ability to make a difference in the lives of these individuals. In 2020, there have been new CDT codes implemented to aide dental care workers to identify and help manage the oral systemic link of diabetes. This course will help identify the types, causes and treatments to provide the best care possible.

Learning Objectives

- Identify the types and causes of Diabetes Mellitus
- Introduce latest statistics of diabetes
- Review of common medications used to treat diabetes and related conditions
- Introduce alternative glucose monitoring systems in diabetes care
- Understand oral systemic link and risks
- Understand link of periodontal disease and diabetes control
- Identify oral care routines for diabetic patients that may be instrumental for improved homecare
- Introduce CDT code for HbA1C in office testing

Monroe County Dental Society is a component of the 7th District; recognized as a CERP provider through NYSDA.

The Seventh District Dental Society is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at CCEPR.ADA.org.
